ALERT/TYPE	Displayed Description
CPU	CPU identified by the CPU Number failed because of high temperature and/or low power
SYSTEM BOARD FAN	The speed of the system board fan identified by the Cooling Fan Number has dropped below the minimum limit.
TEMPERATURE SENSOR	The temperature of the system board fan identified by the temperature sensor number has dropped below the minimum limit.
POWER SUPPLY	Power Supply identified by the Power Supply Number has been extracted or inserted or has gone into an abnormal state, please look into the Help file for more detail
ADAPTER	The adapter identified by the Adapter Number or its driver is malfunctioning.
CANISTER	The Canister identified by the Canister Number has either been extracted or inserted.
SLOT FAN	The speed of the I/O slot fan identified by the Slot Fan Number has dropped below the minimum limit (slotFanMinSpeed).
CANISTER FAN	The speed of a fan in the canister identified by the Canister Number has dropped below the minimum limit.

Description

CPU

CPU identified by the CPU Number failed because of high temperature and/or low power

SYSTEM BOARD FAN

The speed of the system board fan identified by the Cooling Fan Number has dropped below the minimum limit.

TEMPERATURE SENSOR

The temperature of the system board fan identified by the temperature sensor number has dropped below the minimum limit.

POWER SUPPLY

Power Supply identified by the Power Supply Number has been extracted or inserted or has gone into an abnormal state, please look into the Help file for more detail

ADAPTER

The adapter identified by the Adapter Number or its driver is malfunctioning.

CANISTER

The Canister identified by the Canister Number has either been extracted or inserted.

SLOT FAN

The speed of the I/O slot fan identified by the Slot Fan Number has dropped below the minimum limit (slotFanMinSpeed).

CANISTER FAN

The speed of a fan in the canister identified by the Canister Number has dropped below the minimum limit.
